

The breadth of experience and knowledge of our Tax Group enables us to skillfully handle tax matters ranging from complex commercial transactions to personalized income tax planning.

Income Tax

The Tax Group has substantial expertise in income tax planning for individuals, corporations, partnerships, limited liability companies, and other business entities. We advise business clients in connection with the tax aspects of acquisitions, reorganizations, liquidations, redemptions, and debt restructurings. Working closely with members of the Corporate and Real Estate Groups, we structure roll-ups, like-kind exchanges, joint ventures, and other real estate transactions in the most tax-efficient manner. Our individual clients often seek our advice on the tax consequences of executive compensation, divorce, and investment transactions. In addition, we are experienced at structuring the settlement of complex litigation matters.

We are able not only to provide sophisticated tax analysis, but to draft and negotiate the appropriate agreements to implement the desired arrangements, including buy-sell agreements, partnership agreements, LLC operating agreements, deferred compensation agreements, and tax indemnification agreements. Where appropriate, we will provide formal opinion letters on the tax consequences of specific transactions, or we will file ruling requests with the Internal Revenue Service in order to obtain definitive tax guidance.

Tax Controversies

We also represent clients in resolving disputes with state and federal taxing authorities.
